1 software prior to receiving a copy of it from 11:31:52 2 Mr. Yeager? 3 A The software that I was interested in was	1 Q Okay. So you weren't responsible for the 2 terminal server software as part of your duties at 3 Stanford, were you? 4 A I was not responsible for the terminal
4 the terminal server software, which  5 Q And why did you know about it? 11:32:18  6 A Stanford had a number of terminal servers  7 on its network, and we used them.	5 server software as part of my official duties. 11:36:27 6 Q Okay. So you requested the software from 7 Mr. Yeager out of interest; is that fair? 8 A Yes.
Q Can you tell me what you what is a     terminal server?	9 Q And do you know approximately when you
0 A It is a device for concentrating character 11:32:47	10 made that request to Mr. Yeager for the software?
I mode terminals onto a network, and using a network	A To the best of my recollection, it was
2 protocol to exchange characters back and forth 3 between the terminal server and the networked	12 early 1985. It could have been late 1984, though.  13 Q Do you know who wrote the software that
4 computer at the other end.	14. Mr. Yeager provided to you?
5 Q Did the software that Mr. Yeager provided 11:33:17	15 A I do not know I do not know who wrote 11:37:43
6 to you, did it have a name at the time?	16 the software.
7 A Not that I recall.	Q Do you know anyone who contributed to that
8 Q And was that software actually in use at	18 software?
9 the time that you received a copy of it?	19 A. I believe Mr. Yeager was one of the people
0 A That was my understanding. 11:33:40	20 that contributed to that software. 11:37:58
1 Q That it was in use? 2 A Yes.	Q Do you know anyone else who contributed to
2 A Yes. 3 Q Where was it in use?	22 ii? 23 A Not with any certainty.
4 A In terminal servers on the Stanford	24 Q Who is Benji Levy?
5 network. 11:33:51 Page 62	25 A He was an undergraduate at Stanford. 11:38:29
Q And would this software let's say the 11:33:54	1 Q While you were there? 11:38:34
2 terminal server part of it at least, was that	2 A Yes.
3 running on the for example, the DECSYSTEM-20 4 computers?	3 Q Did you ever work with Mr. Levy? 4 A Yes.
5 A No. 11:34:09	5 Q In what capacity? 11:38:48
6 Q What was it running on?	6 A I hired him.
7 A It was running on a SUN processor card	7 Q At Cisco?
8 where well, a SUN processor card.	8 A Yes. At Stanford.
9 Q The SUN processor card was not a itself	9 Q Oh. In what role did you hire him? Or
0 a Sun computer, known as a Sun computer yet? 11:34:52	10 what position did you hire him for, to be clear? 11:39:26
1 A It was not known it was could you	11 A We referred to it as a cable a cable
2 rephrase the question?	12 troll. Hardware technician would probably be the
3 Q Sure.	13 more modern description of that.
Well, SUN SUN is you're referring to	14 Q Did he work at all on modifying the
5 Sun Microsystems? 11:35:14	15 software that Mr. Yeager provided to you? 11:40:21 16 A Not to my direct knowledge. Software was
6 A No. 7 Q What does what's the SUN processor card	A Not to my direct knowledge. Software was     not part of his job duties for me.
8 then?	18 Q And to be clear, did Mr. Almquist work on
9 A Stanford University network.	19 modifying any of that software that Mr. Yeager
O Q Okay. And did that do you understand 11:35:24	20 provided to you? 11:40:55
Company of the first of the control	21 A He may have.
1 that that SUN became the Sun of Sun Microsystems?	
that that SUN became the Sun of Sun Microsystems?  A That is my understanding.	22 Q To your knowledge, did he?
	<ul> <li>Q To your knowledge, did he?</li> <li>A I have no direct knowledge of that.</li> </ul>
2 A That is my understanding.	

1 A No. That was not part of my duties. 11:41:16	1 to Stanford. 11:45:55
2 Q Did you talk to anyone about what you were	2 Q And that's what you had done your
3 going to do with that software before doing it?	3 modifications on?
4 A I may have.	4 A Yep.
5 Q Who did you talk to? 11:41:38	5 Q Did you make any modifications to the 11:46:12
6 A I don't remember if I talked to anybody	6 router functionality of the Yeager software?
7 before I started on that.	7 A My initial interest was only in the
8 Q And what prompted you to start modifying	8 only in the terminal server software.
9 or changing that software?	9 Q So is that I'm sorry. Is that a no,
10 A I wanted to learn a new technology, and I 11:42:39	10 you didn't make any modifications to the router 11:46:43
11 wanted to see if I could improve the behavior of the	11 functionality?
12 terminal server.	12 A I removed it.
13 Q What was your intention of what you would	13 Q You removed it from your copy or what
14 do with the with your modifications to the	14 do you mean, you removed it?
15 software? 11:43:04	15 A That is correct. I removed it from my 11:46:58
A That I would be able to improve its	16 copy.
17 performance and its manageability.	17 Q So again, going back to your testimony
18 Q Sticking with the terminal server	18 earlier this morning, when you referred to extending
19 functionality, did you improve its performance?	19 and making improvements on software you received
20 A Yes, I did. 11:43:44	20 from Mr. Yeager, was that only as to the terminal 11:47:49
21 Q And did you provide your modifications	21 server functionality?
22 back to Mr. Yeager?	22 A That was my initial intent.
23 A I don't recall if I I don't recall if I	23 Q Okay. My question was asking about what
24 did or not.	24 you did as opposed to your intent.
Q Did you provide those to anyone at 11:44:13 Page 66	Did you only extend and/or make Page 6
1 Stanford? 11:44:15	1 improvements to the terminal server part of the 11:48:18
2 A I don't remember if I provided the source	2 software Mr. Yeager provided you?
3 back. I certainly provided copies of the improved	3 MR. NEUKOM: Objection to form. Vague,
4 software.	4 compound.
5 Q You mean perhaps in binary form? 11:44:34	5 THE WITNESS: At a later date I did write 11:48:39
6 A In binary form.	6 router support and put it into the software.
7 Q Why didn't you sorry. Strike that.	7 BY MR. FERRALL:
8 The software you received from Mr. Yeager	8 Q Okay. First, what's router support?
9 was in source?	9 A Being able to receive a packet on one
0 A Correct, 11:44:44	10 interface and figure out which of which other 11:49:28
1 Q Why didn't you provide the source back to	11 interface to send it out upon, rewriting the header
2 Stanford?	12 of the packet as appropriate.
3 MR. NEUKOM: Objection. Misstates prior	13 Q What was the strike that.
4 testimony.	14 Was there router support functionality in
THE WITNESS: I don't recall if I provided 11:45:02	15 the software Mr. Yeager provided you? 11:50:00
6 the source code back to anybody at Stanford, I was	16 A Yes.
7 Stanford.	17 Q And what did you do to change that?
	18 A I removed his support because I wasn't
8 BY MR. FERRALL:	
8 BY MR. FERRALL: 9 Q Did you implement the improved terminal	19 interested in it at the time, and later on later
	20 on my interest changed. 11:50:45
9 Q Did you implement the improved terminal	20 on my interest changed. 11:50:45
9 Q Did you implement the improved terminal 10 server software at Stanford? 11:45:22 11 A Yes.	20 on my interest changed. 11:50:45 21 Q Okay. I understand that.
9 Q Did you implement the improved terminal 0 server software at Stanford? 11:45:22 1 A Yes. 2 Q So where did the source for that improved	20 on my interest changed. 11:50:45 21 Q Okay. I understand that. 22 So what happened later on when your
9 Q Did you implement the improved terminal 10 server software at Stanford? 11:45:22 11 A Yes.	20 on my interest changed. 11:50:45 21 Q Okay. I understand that.

1 pieces of the PUP support that Mr. Yeager had there. 11:51:28	1 programming techniques, possibly where the stuff 11:57:53
Well, actually, the PUP support actually	2 could be what stuff would be useful to Stanford
3 already existed for the terminal server portion.	3 that would also be interesting for me.
4 Q So the terminal server portion already had	4 Q At what time did you first have the idea
5 PUP support for routing? 11:52:08	5 to use this software in your own commercial venture? 11:58:3
6 A For routing and for terminal sessions.	6 MR. NEUKOM: Objection to form.
7 Q Okay. And did the software from	7 THE WITNESS: I did not come up with that
8 Mr. Yeager have any routing support for IP?	8 idea.
9 A Yes.	9 BY MR. FERRALL:
0 Q And did you use any of that? 11:52:46	10 Q Who did? 11:58:54
1 A No.	11 A I believe it was Len.
2 Q What did you do with it?	12 Q And when did you first learn of Len
3 A It was a confusing mess. I threw it out	13 Bosack's idea to use this software that you were
4 and wrote my own.	14 working on?
5 Q And when did you write that routing 11:53:03	15 A Sometime in early '86. 11:59:32
6 support for IP?	16 Q Did you ever tell Mr. Hanson about that
7 A Late '85, I believe.	17 idea to use the software in a commercial venture?
8 Q You wrote that the code sorry.	18 A No.
9 When you wrote that, the code was on this	19 Q Did you tell anyone at Stanford about that
0 UNIX computer at Stanford; is that right? 11:53:51	20 idea other than Mr. Bosack? 11:59:56
A I did my development on a UNIX system at	21 A No.
2 Stanford.	22 Q Who is Eric Schoen, S-C-H-O-E-N?
3 Q Did you talk to anyone about your	23 A I don't know.
4 intentions in writing this IP routing support prior	24 Q Do you know a Frank Gilmurray?
5 to doing so? 11:54:41	25 A Vaguely. 12:00:25
Page 70	Page 7
I A No. 11:54:43	1 Q Do you know 12:00:28
2 Q Why did you do it?	2 A I recognize the name.
3 A I had figured out terminal servers and	3 Q You can't pin what he did in terms of your
4 PUP. The Internet protocol was the was the new	4 time at Stanford?
5 developing technology, and I wanted to learn more 11:55:07	5 A 1 my recollection is that he was a 12:00:45
6 about how IP worked.	6 systems programmer or some sort of software person
7 What resources did you look at to learn	7 or manager I believe in one of the other projects.
8 about how IP worked?	8 I don't know whether it was AIM or SUMEX.
A I looked at RFCs.	9 MR. FERRALL: Okay. All right. We've
Q Anything else? 11:55:46	10 been going for a bit. Why don't we go off the 12:01:09
A Not that I not that I recall.	11 record.
Q At some point did you tell anyone else at	12 MR. NEUKOM: Sounds good.
3 Stanford that you were writing this IP support?	13 THE VIDEO OPERATOR: Going off the record,
4 A I told my boss, Steve Hanson, and I also	14 the time is 12:01 p.m.
5 discussed it with Len Bosack. 11:56:28	15 (Recess, 12:01 p.m 12:48 p.m.) 12:01:15
6 Q Tell me about your discussion with	16 (Exhibit 29, Exhibit 30 and Exhibit 31
7 Mr. Hanson. What did you say to him?	17 were marked for identification and are
A "This is what I'm doing in my spare time."	18 attached hereto.)
Q And what did he say?	19 THE VIDEO OPERATOR: Back on the record.
D A "Fine." 11:56:54	20 The time is 12:48 p.m. 12:47:54
Q And what did you tell Mr. Bosack?	21 BY MR. FERRALL:
2 A That I was I don't remember the details	22 Q Good afternoon, Mr. Lougheed.
3 of what I told him. We had technical discussions.	23 I'd like to hand or have handed to you
4 Q What were the technical discussions about?	24 three exhibits that we had marked at the break, and
5 A How elements of the protocol suite worked, 11:57:42 Page 71	25 I'll identify them for the record. But they're 12:48:12 Page 7:

1 right now. 12:58:39	I calls for a conclusion. 13:03:06
<ol> <li>Mr. Lougheed, you have to understand,</li> </ol>	THE WITNESS: Documents whose name I do
3 we've got a lot to cover today, and I need to	3 not recall.
4 A And I'm also under oath, and I want to	4 BY MR. FERRALL.
5 make sure my replies to your answers (sic) are 12:58:47	5 Q Can you describe generally what they were? 13:03:16
6 correct.	6 A They were documents that described a
7 Q Okay. So I'm asking you you can put	7 packet format and described an associated state
8 the document down, frankly.	8 machine.
9 Do you ever recall reviewing an RFC for an	9 Q Is the address resolution protocol
10 address resolution protocol? 12:58:58	10 referred to simply by the acronym ARP? 13:03:59
11 A Yes, I do recall reviewing a document	A There's a general concept of an address
12 it may have been an RFC — on address resolution.	12 resolution protocol, and then there's one, possibly
13 Q Do you know who developed address	13 more, that are may be described in various
14 resolution protocols?	14 documents from the IETF.
15 A I don't recall. 12:59:20	15 Q When did you first hear have you ever 13:04:52
16 Q Did you contribute to that field?	16 heard the address resolution protocol abbreviated as
17 A No.	17 ARP?
8 Q All right. Do you know David Plummer?	18 A Yes.
9 A I have heard the name before but I don't	19 Q When did you first hear that abbreviation?
20 know the person. 12:59:31	20 A I don't recall I don't recall the 13:05:17
Q How many IETF RFCs have you authored in	21 precise time.
22 whole or in part?	Q Was it while you were still at Stanford?
23 A Two, maybe three.	A It certainly could have been.
Q What were the subject or subjects of those	24 Q Did you develop any features for the
25 RFCs? 13:00:07	25 address resolution protocol yourself? 13:05:52
Page 78	Page :
1 A They were all on the border gateway 13:00:09	MR. NEUKOM: Objection. Vague. 13:05:56
2 protocol.	2 THE WITNESS: I do not understand your
3 Q Has Cisco ever had any policies about	3 question. What do you mean, develop features for
4 their employees submitting RFCs to the IETF?	4 the address resolution protocol?
5 A I'm not aware of any specific policies. 13:01:02	5 BY MR. FERRALL: 13:06:12
6 Q Did the software that you worked on at	6 Q Fair enough. Let me ask it a different
7 Stanford, the routing and terminal server software	7 way.
8 we talked about, did that include an address	8 Did you contribute to any IETF RFC
9 resolution protocol?	9 relating to the address resolution protocol?
0 MR. NEUKOM: Objection to form. Vague. 13:02:09	10 MR, NEUKOM: Objection. Asked and 13:06:27
1 BY MR. FERRALL:	11 answered.
2 O Libertham and Discount Color	
	12 THE WITNESS: No.
3 protocol feature.	13 BY MR. FERRALL:
3 protocol feature. 4 MR. NEUKOM: Same objection.	<ul> <li>13 BY MR. FERRALL:</li> <li>14 Q Did you develop features at while at</li> </ul>
3 protocol feature. 4 MR. NEUKOM: Same objection. 5 THE WITNESS: Yes. 13:02:23	<ul> <li>13 BY MR. FERRALL:</li> <li>14 Q Did you develop features at while at</li> <li>15 Cisco that relate to ARP, if you don't mind me using 13:06:44</li> </ul>

13:48:49	1 (Exhibit 35 was marked for identification 16:48:10
	2 and is attached hereto.)
	3 BY MR. FERRALL:
	4 Q We've marked as Exhibit 35 a set of emails
	5 bearing control numbers CSI-CLI-01134849 to 850. 14:03:1
	6 This appears to be some email exchange
	7 between you and Joe Hielscher.
	8 Did I say that right?
	9 A 1 have no idea if you said it correctly.
13:49:27	10 Q Do you know who he is? 14:03:47
	11 A I think he's a communications person
	12 working at Cisco
	13 Q Okay, My question here is just about your
	14 email at the top of the first page. You explain in
	15 the first sentence that Releases 8, 9 and 10 can be 14:04:22
	16 found on a volume if you have a UNIX account. And
	17 then you write, "Releases 5, 6 and 7 are likely
	18 lost, since I believe their archives were deleted by
	19 someone."
	20 Do you do you have a recollection about 14:04:43
	21 whether releases of IOS are were lost at some
	22 point?
	23 A Yes.
	24 Q Were they? Were certain releases lost?
12.50.26	25 A Yes. The source code to a number of early 14:05:11
13:50:36 Page 98	Page 100
	1 releases was stored on a machine that was 14:05:17
	2 decommissioned when nobody nobody clever was
	3 looking in that direction.
	4 Q And when did that happen, do you know?
13:51:05	5 A I don't know when it happened. Possibly 14:05:49
	6 early '90s.
	7 (Exhibit 36 was marked for identification
	8 and is attached hereto.)
	9 BY MR. FERRALL:
13:51:30	10 Q We've marked as Exhibit 36 a document 14:06:18
	11 entitled "Stanford Ethertip/Gateway User and
	12 Configuration Guide." bearing control numbers
	13 CSI-CLJ-01315523 to 5568.
14 10 1550	14 Do you recognize Exhibit 36?
15 MR. FERRALL: I didn't realize that. 13:51:39	15 A Yes, I do. 14:06:48
16 Thank you for clarifying that.	16 Q And did you co-author this?
17 Actually, we can take a quick break.	17 A Yes.
18 MR. NEUKOM: Okay.	18 Q With Mr. Truitt?
19 THE VIDEO OPERATOR: Going off the record,	19 A Yes.
20 the time is 1:52 p.m. 13:51:57	20 Q Was this a what was the purpose of this 14:07:14
21 (Recess, 1:52 p.m 2:03 p.m.)	21 guide?
22 THE VIDEO OPERATOR: Back on the record.	22 A To describe to users and administrators
	23 the functionality and operation of the of the
23 The time is 2:03 p.m.	24 software.
24 MR. FERRALL: Let's mark this as the next 25 exhibit. 14:03:07	25 Q And which software is this describing? 14:07:54

1 exhibit. 14:20:06	1 Q Did Cisco use the word "mode" in 14:25:27
2 (Exhibit 37 was marked for identification	2 describing its functionality of its software?
3 and is attached hereto.)	3 A We had there would be the phrase
4 BY MR. FERRALL:	4 "configuration mode" was certainly being used at
5 Q We've marked as Exhibit 37 a document 14:20:18	5 this time. 14:25:46
6 entitled "cisco Systems AGS User Manual System	6 Q Okay. And how did how did
7 Version 6.0." It bears control numbers	7 "configuration mode" differ from any other mode of
8 CSI-CLI-00358166 to 222.	8 operation?
9 Do you recognize Exhibit 37?	9 A It allowed you to type in command
10 A I do. 14:20:38	10 expressions that affected the configuration of the 14:26:04
Q Did you help prepare it?	11 system.
12 A I did.	12 Q And if you weren't in configuration mode,
13 Q And this is this is the manual that	13 how would you describe whatever mode you were in?
4 accompanied Version 6 of Cisco's software release;	14 A You were at this time you would have
15 is that correct? 14:20:58	15 said you are at the EXEC. 14:26:32
16 A Correct.	16 Q What does "EXEC" mean?
Q Do you recall who else would have helped	17 A It was the term that I chose to refer to
8 you prepare Exhibit 37?	18 the all the stuff that wasn't the configuration
9 A 1 believe I was the sole author.	19 mode.
20 Q Who strike that. 14:22:42	20 Q Give me an example of what that stuff is 14:27:08
10S has different modes, correct?	21 or was.
MR. NEUKOM: Objection. Vague, compound.	22 A The commands for connecting to other
THE WITNESS: Yes.	23 computers on the network, the class of command
24 BY MR. FERRALL:	24 expressions that we call the "show" commands.
25 Q In the current version of IOS, how many 14:23:18 Page 106	25 Basically the set of commands that did not 14:27:48 Page 1
1 different modes are there? 14:23:20	1 reveal basically mostly status commands and ones 14:27:5
2 A A lot.	2 for handling connections over the network to other
3 Q Do you know how many?	3 hosts, sort of a subset of the of the terminal
4 A No, not at present.	4 server commands.
5 Q More than five? 14:23:44	5 Q And you said you chose the term "EXEC," 14:28:26
6 A Yes.	6 that's E-X-E-C; is that right?
7 Q More than ten?	7 A Yes.
8 A Probably.	8 Q You chose that term, yes?
9 Q Were there different modes in the	9 A Yes.
0 original actually, strike that. 14:24:04	10 Q How did you come up with that term? 14:28:39
Let me ask terminology.	II A Well, I had a number of possible ways of
2 What did you call the original Cisco	12 describing it. I could have used "shell" after
3 software before it became known as IOS?	13 the modeling it along the UNIX way of UNIX
4 A The gateway software. The router	14 equivalent.
5 software. The terminal server software. The AGS 14:24:25	15 From I decided EXEC in sort of you 14:29:15
6 software. There was no branding.	16 know, inspired by the TOPS-20 command processor.
7 Q This Exhibit 37 refers to "AGS User	17 You know, calling it the command processor would
8 Manual."	18 have been another possibility.
9 What does AGS stand for?	There was a number of possibilities that I
0 A Advanced gateway server. 14:24:45	20 could have called it, what I could have called that 14,29;38
I Q Okay. At the time of Version 6 of the	21 particular part of the software, and I ended up
2 Cisco software, how many different modes were there,	22 choosing EXEC.
3 do you know?	23 Q Now, were you responsible for determining
4 A So I don't understand how you're using the	24 the prompt symbol on the interface?
5 word "mode." 14:25:21	25 I'm sorry. Let me be clear. 14:30:26
5 Word Hode. 14,25,21	25 Thi sorty. Let me be clear. 14.50.20

	The state of the s
1 I'm talking about on the interface line, 14:30:28	I Q And you're not aware of any use of a hash 14:35:22
2 there are symbols that precede the input point, such	2 sign as a prompt?
3 as a hash sign, for example, right?	3 A Not to my recollection.
4 A So for I was responsible for choosing	4 Q You were familiar with UNIX in the mid
5 the prompts for the command line interface, for the 14:30:45	5 1980s, right? 14:36:18
6 CLI	6 A As a user of UNIX.
7 Q Okay And tell me what those prompts are.	7 Q And by the way, are you familiar with
8 the various prompts that the Cisco CLI uses	8 Linux?
9 A There are many right now But at the time	9 A Only as a user.
0 there was the the unprivileged EXEC commands, and 14:31:09	10 Q When did you first become familiar with 14:36:38
1 that was the host name of the of the router or	11 Linux?
2 of the router, followed by a close angle bracket	12 A With Linux? I think I first heard mention
3 There was a privileged mode, and it	13 of it in the late '90s.
4 changed that prompt to a hash mark	14 Q Did Cisco come up with the nomenclature of
5 And in the initial implementation of 14:31:55	15 calling a mode "privileged," to your knowledge? 14:38:02
6 configuration mode, there was no prompt	16 A I don't believe I don't believe Cisco
7 Q Okay How did you choose the hash prompt	17 came up with that terminology.
8 for the privileged mode?	18 Q Let me turn to the current set of IOS CLI
9 A It was visually large and different than	19 commands.
0 the different just different than the 14:32:25	20 I don't expect an exact number, but do you 14:38:54
1 unprivileged EXEC prompt	21 know approximately how many IOS CLI commands there
	22 are today?
22 Q Okay How did you use the unprivileged	
3 close angle bracket prompt?	23 A I would have to guess. It is a it's a
A I don't understand your question	24 very large number.
5 Q Did you choose to use the close angle 14:32:59 Page 110	25 Q Can you just give me a ballpark? 14:39:15 Page 11
F bracket prompt? 14:33:02	1 A I believe it's in the low thousands. 14:39:20
2 A Router name, close angle bracket.	2 Q Do you know if it's more or less than
3 Q Right.	3 5,0007
4 A Yes, I chose that.	4 A No. I don't. I've not counted it. I've
5 Q Okay. How did you come to choose that? 14:33:09	5 not I've not counted it, nor have I heard of 14:39:43
6 A Well, there were when you have multiple	6 somebody who has counted how many there are and how
7 devices on a network, one of the first things you	7 many variations there are in total.
8 want to know if you're typing at something is to	8 O What is IOS XR?
9 what you are typing at. So that sort of the most	9 MR. NEUKOM: Objection. Asked and
0 aesthetic choice was the was the name of the 14:33:51	10 answered. 14:40:16
1 device.	
2 And the angle bracket was a nice visual	12 variant of IOS for the for the service provider
3 way of terminating you know, here's where your	13 marketplace.
4 type-in begins. Here's where the prompt ends.	14 BY MR. FERRALL:
5 here's where the type-in begins. 14:34:19	15 Q Does IOS XR have a different set of CLI 14:40:43
6 Q Had you ever seen the angle bracket used	16 commands?
7 as a prompt in any other system?	17 A It has
8 A I wasn't aware of any generally available	18 Q From IOS, that is.
9 host general purpose timesharing that actually	19 A It is substantially the same. There is
0 that was the default, that was the prompt. 14:34:56	20 functionality that exists only for a service 14:41:02
Q I'm not sure what you mean by that.	21 provider that has commands that are not contained in
2 But had you ever seen any system that used	22 the other variants of IOS.
	23 Q What is IOS XE?
3 a close angle bracket as a prompt?	23 Q What is 103 AE7
	24 A That is a variant of IOS.
23 a close angle bracket as a prompt? 24 A No. TOPS-20 used an "at" sign and UNIX 25 used a percent sign. 14:35:19	

1 O Who did you Col that you? 14:51:20	
1 Q Why did you feel that way? 14:51:39	
2 A Because the changes that I had in mind	2 Q In what ways does it have value for Cisco?
3 were basically minor tweaks that didn't add value.	3 MR. NEUKOM: Same objections.
4 Q Do Cisco customers invest in training to	4 THE WITNESS: It is the it's the look
5 become familiar with Cisco's CLI? 14:52:2	4 5 and feel of Cisco router software, 14:55:38
6 MR. NEUKOM: Objection. Vague, compound	6 BY MR. FERRALL:
7 and foundation.	7 Q Why is that valuable?
8 THE WITNESS: I have no reason to believe	8 MR. NEUKOM: Objection. Calls for
9 that they don't.	9 opinion, and vague.
10 BY MR. FERRALL: 14:52:41	10 THE WITNESS: It lets customers know what 14:56:1
11 Q Do you know that they do?	11 they are getting.
12 MR. NEUKOM: Same objections.	12 BY MR. FERRALL:
13 THE WITNESS: I don't have direct	13 Q Can you explain that more? How does a CLI
14 experience with customers' network operations.	14 command set let customers know what they are
15 BY MR. FERRALL: 14:52:59	15 getting? 14:56:37
16 Q Well, but you're familiar with the whole	16 A There is a it's a look and feel that
17 Cisco certification process, aren't you?	17 long-time customers are familiar with, are
8 A I know of it.	18 comfortable with, and it represents that this is
9 MR. NEUKOM: Objection. Vague.	19 a this is a Cisco product, not necessarily
20 BY MR. FERRALL: 14:53:13	20 somebody else's product. 14:57:24
Q What is that process? Can you tell me	21 MR. NEUKOM: Brian, whenever you think is
22 what you know about it?	22 a good time. I think we've been going about an
A It is a set of training and a	23 hour.
24 certification that you have understood the training	24 MR. FERRALL: Okay. Okay. We can take a
25 involved in networking. 14:53:29	25 break. 14:58:04
Page 118	Page 12
I Q What's Cisco's role in strike that. 14:53:35	THE VIDEO OPERATOR: Going off the record, 14:58:06
2 What are the levels of certification one	2 the time is 2:58 p m
3 can get from that training, do you know?	3 (Recess, 2:58 p m - 3:24 p m)
4 A I do not know.	4 THE VIDEO OPERATOR: Back on the record
5 Q Have you ever heard of the term CCIE? 14:53:51	5 The time is 3:24 p m 15:24:02
6 A Yes, I have.	6 BY MR FERRALL:
6 A Yes, I have. 7 Q What's that?	6 BY MR FERRALL: 7 Q Mr Lougheed, when did you first become
6 A Yes, I have. 7 Q What's that? 8 A I believe it's Cisco certified Internet	6 BY MR FERRALL: 7 Q Mr Lougheed, when did you first become 8 aware of DOS, D-O-S?
6 A Yes, I have. 7 Q What's that? 8 A I believe it's Cisco certified Internet 9 engineer. I'm not sure.	6 BY MR FERRALL: 7 Q Mr Lougheed, when did you first become 8 aware of DOS, D.O-S? 9 A 1'd say whose DOS?
6 A Yes, I have. 7 Q What's that? 8 A I believe it's Cisco certified Internet 9 engineer. I'm not sure. 0 Q Do you know what Cisco's role is in 14:54:10	6 BY MR FERRALL:  7 Q Mr. Lougheed, when did you first become  8 aware of DOS, D-O-S?  9 A Pd say whose DOS?  10 Q MS-DOS 15:24:36
6 A Yes, I have. 7 Q What's that? 8 A I believe it's Cisco certified Internet 9 engineer. I'm not sure. 0 Q Do you know what Cisco's role is in 14:54:10 1 determining that certification for a CCIE?	6 BY MR FERRALL:  7 Q Mr Lougheed, when did you first become 8 aware of DOS, D-O-S?  9 A 1'd say whose DOS?  10 Q MS-DOS 15:24:36  11 A MS-DOS? 1	MR. FERRALL: Let's mark this as the next 15:26:35	1 message indicates that you are looking at an error 15:29:49
2	exhibit.	2 message. An ancient operating system called TOPS-20
3	(Exhibit 38 was marked for identification	3 used such a convention and I adopted it."
4	and is attached hereto.)	4 Do you see that?
5	BY MR. FERRALL: 15:26:37	5 A Yeah, I do see that. 15:29:59
6	Q Exhibit 38 is a set of emails between you	6 Q Why did you adopt a TOPS-20 convention?
7	and Mr. Remaker, among others. It bears control	7 A Of the possibilities that I had, that
	numbers CSI-ANI-00043306.	8 seemed that seemed a reasonable to me, it
9	A Okay. I'd like to read this.	9 seemed like a reasonable way of doing things
10	Q First let me ask you the question so you 15:27:19	10 Q Did you get permission from Digital 15:30:32
1	know what to look for.	11 Equipment Company to use that convention?
2	A I will forget the question by the time I'm	12 MR. NEUKOM: Objection. Calls for a legal
3	done reading this.	13 conclusion and misstates prior testimony.
4	Q Well, Mr. Lougheed, that's not the way it	14 THE WITNESS: No. I did not seek
5	works, actually. I ask the question and you answer 15:27:28	15 permission. 15:30:55
6	it.	16 BY MR. FERRALL:
7	A Okay.	17 Q Have you ever heard of the acronym RIP in
8	Q If you can't answer it, then you tell me.	18 the context of networking?
9	My only question is, did you send the	19 A It typically means routing information
	email that's at the top of Exhibit 38, the one at 15:27:38	20 protocol. (15:31:18
	12-11-2008 at 10:14 p.m.?	Q You're familiar with that protocol?
2	MR. NEUKOM: Mischaracterizes the document	A It's been a while, but yes, I'm familiar
3	on its face.	23 with it.
4	And I know that Mr. Ferrall would like you	Q Did you make up the acronym RIP for
5	to feel comfortable to read the page-and-a-half 15:27:54	25 routing information protocol? 15:31:32
	Page 122	Page 12
	document that he's just put in front of you before 15:27:57	I A No, I did not make up that acronym. 15:31:37
2	answering his question.	Q Did you make up the term "routing
3	THE WITNESS: Okay. I'll read it.	3 information protocol"?
4	MR. FERRALL: Actually, no, I would like	4 A No.
5	him to answer the question. 15:28:03	5 Q Did you submit an RFC for the routing 15:31:51
6	Q Are you telling me you can't tell me	6 information protocol?
7	whether you sent the email?	7 A No.
8	MR. NEUKOM: It's a totally unfair	8 Q Do you know who did?
		9 A No, I don't know who did.
	question. The email that he sent would necessarily	
	include everything that follows. 15:28:10	10 Q Did you ever ask permission from the 15:32:25
1	If you want him to tell you whether he	11 person who made up the term "RIP" for permission to
2	remembers this or whether he sent it, let him read	12 use it, to use that term?
3	the document. Come on, Brian.	13 MR. NEUKOM: Objection. Foundation,
4	It's a page and a half. We're not talking	14 vague, and calls for a legal conclusion.
5 :	about him wasting 30 minutes to read a product 15:28:20	THE WITNESS: There was no one whose 15:32:50
	manual. It's a page-and-a-half email. The witness	16 permission one could ask.
	has said he wants to read it, and we're going to let	17 BY MR, FERRALL:
	him read it.	18 Q Well, I'll tell you, a Mr. Charles Hedrick
9	THE WITNESS: Okay. I've read it.	19 at Rutgers submitted what I believe to be the first
	BY MR. FERRALL: 15:29:28	20 RFC on the routing information protocol. 15:33:05
	Q Okay. Did you send this email that's	21 Do you know Mr. Hedrick?
1	dated December 11, 2008, at 10:14 p.m.?	22 A I do.
	A Chief of the A Company of the Comp	
2 (	A I believe I did.	Q Did you ever ask him for permission to use
2 (	The state of the s	Q Did you ever ask him for permission to use the term "RIP"?
3	A I believe I did.	

	answered. 15:33:15	MR. NEUKOM: Objection. Compound, vague. 15:37
2	THE WITNESS: Mr. Hedrick formally	2 THE WITNESS: we did not make any such
3 (	documented an informal standard that was already in	3 assertions.
4 1	use in the industry for a number of years.	4 MR. NEUKOM: And foundation.
5	BY MR. FERRALL: 15:33:27	5 BY MR. FERRALL: 15:37:08
6	Q And what's the significance of that?	6 Q Did you ever have an agreement with

And since "address" was already 19 taken to refer to IP functionality, Internet 20 protocol functionality, we came up with "DECnet 21 address," and then had a DECnet address after it. 22 That "DECnet address" command could have

1 address we were referring to. But we chose "DECnet 15;41:13	
2 address."	A That was the aesthetic choice I made.
3 It became clear that much more that we	3 MR. NEUKOM: Objection. Mischaracterizes
4 were becoming a multi-protocol router. We were	4 prior testimony.
5 adding other protocols into the box, into the 15:41:27	5 THE WITNESS: There were many possible 15:44:4
6 software.	6 ways of doing it. As I indicated, I could perhaps
7 And I had I value I value the	7 take a look at an address and then infer what it
8 aesthetic of having a symmetric-looking command line	8 was. But that was not the choice that I made at the
9 expression, symmetric hierarchy. It was clear we	9 time.
10 were heading towards a hierarchy. 15:41:52	10 BY MR. FERRALL: 15:45:07
So at some point after DECnet and perhaps	11 Q What were the alternative commands that
12 a few other protocols to make things look very	12 you considered for "IP host"?
13 similar, we started prefacing our IP-only commands	13 A "Name." "Name" was certainly one of the
14 with "IP." And that gave a very what I thought	14 possible candidates. "Network system" or
15 was a very elegant, symmetric, elegant way of 15:42:16	15 "system" there are many, many words that one 15:45:51
6 referring to different protocols within a	16 could use to refer to all sorts of different things.
7 multi-protocol router.	17 Q Okay. But now you're talking about
8 So that is the history of the "IP address"	18 alternatives for the word "host," right?
9 command.	19 A Um-hum.
20 Q Okay. My question was simpler. 1 15:42:36	20 Q Okay. You didn't you're not the first 15:46:08
I appreciate that answer. But my question was a	21 one to use the word "host," are you?
	Project Control Contro
22 little simpler than that, but let me ask it a	
3 different way.	23 Q I mean, "host" had been used for well
You had heard of the term "IP address"	24 before you joined Cisco to refer to a computer host.
25 before you joined Cisco, hadn't you? 15:42:51 Page 130	25 It's a conventional term, right? 15:46:29 Page 13
4 is talking about different networking protocols, one 5 needs to clarify which networking protocol one is 6 talking about. So it was probably terminology that 7 was in the air. 8 BY MR. FERRALL; 9 Q Does the same go for "IP host," also? You 10 had heard that before you joined Cisco? 15:43:29 11 MR. NEUKOM: Objection. Misstates prior 12 testimony.	4 possibilities that I had that I had.  5 BY MR. FERRALL: 15:46:46  6 Q And "host" was the term that was used in  7 the commands in the software that came from  8 Stanford; is that right?  9 MR. NEUKOM: Objection. Mischaracterizes  10 prior testimony. 15:47:13  11 THE WITNESS: I had implemented the "host"
THE WITNESS: The original form of the most command was just "host command." It was another one that had to distinguish, in a 15:43:41 multi-protocol world, in a multi-protocol piece of	12 command while I was at Stanford. 13 BY MR. FERRALL: 14 Q Okay. And what did you so did you 15 decide to use the word "host" for the command on the 15:47:2 16 software you worked at while you were employed by

1 product was built by one company, to use your words? 16:31:31	1 such things. 16:35:35
2 A Well, that was the belief of the	2 Q Prior to your joining Cisco, were you
3 engineers.	3 aware of any operating systems that had two or more
4 Q I'm asking you to explain why you believe	4 commands that began with the same first word?
2.337.5.1	5 MR. NEUKOM: Objection, Vague. 16:36:02
6 A It's an opinion of mine. 1 have no did	6 THE WITNESS: Two or more commands that
7 not have evidence for it at the time.	7 began with the same word. I can't recall any.
8 Q What is the alternative or alternatives to	8 MR. FERRALL: Let's mark this as the next
9 the framework for the hierarchy you described?	9 exhibit.
10 MR. NEUKOM: Objection. Vague and 16:32:33	10 (Exhibit 39 was marked for identification 16:48:10
11 compound, calls for speculation.	11 and is attached hereto.)
12 THE WITNESS: So I don't have experience	12 BY MR. FERRALL:
13 with other vendors' interfaces for routers and	13 Q Exhibit 39 is a document entitled "Cisco's
14 networking devices. I have only had descriptions	14 Response to Arista's Interrogatory No. 16 amended
15 from others of styles of interfaces. 16:33:01	15 Exhibit D-1 (IOS Release 11.0)," 16:37:09
16 We had a competitor named Wellfleet that	16 And I assume, Mr. Lougheed, that you
17 attempted to introduce a user interface that, as it	17 haven't seen the cover page, but tell me if you've
18 was described to me, was typing in ASN.1 notation as	18 seen any of the inside to Exhibit 39.
19 defined in the SNMP protocol for retrieving and	19 A I've not seen the inside of this.
20 setting information 16:33:27	20 Q You've never seen these images? 16:37:35
21 An ASN, I notation is numbers and	21 A I don't recall having seen them before.
22 numbers and decimal points.	22 Q Okay. So if you look at if you go a
23 My understanding is that it was not	23 couple of pages in, let's just take an example of
24 popular with customers. But it was a way of	24 the "clear" command set
25 managing a system. 16:33:52 Page 150	25 A I'd like to page through the rest of this 16:38:14 Page 15
1 BY MR. FERRALL: 16:34:00	I before I offer a 16:38:18
2 Q Are you aware of any other CLI command	2 MR. NEUKOM: Which page are you currently
3 sets that are arranged hierarchically?	3 looking at, Brian?
4 A No, I'm not.	4 MR. FERRALL: The page that begins with
5 Q Were you aware of any prior to your 16:34:16	5 the "clear" command. It's number 5, I guess. I 16:38:24
6 strike that.	6 didn't realize there were pages on here.
7 Prior to your joining Cisco, were you	7 MR, NEUKOM: Mr, Simmons has helpfully
8 aware of any operating systems that used multi-word	8 reminded me that we've now been on the record for an
9 commands?	9 hour and 15 minutes. I'm open-minded on timing, but
10 MR, NEUKOM: Objection. Vague. 16:34:39	10 when we get to a good spot, it would be nice to take 16:38:49
THE WITNESS: I was not aware of any	11 a short break.
12 router or switch products that had such things.	12 MR. FERRALL: Okay. Let me just finish
13 BY MR, FERRALL:	13 some questions about this.
	[1] : : : : : : : : : : : : : : : : : : :
15 systems that used multi-word commands? 16:34:53	15 briefly. 16:39:32
MR. NEUKOM: Objection. Asked and	16 BY MR. FERRALL:
17 answered.	17 Q Okay. If you could turn to page 5, which
18 THE WITNESS: Yes.	18 is where the "clear" command set begins.
19 BY MR. FERRALL:	19 Are you there?
Q What examples were you aware of? 16.35:04	20 A Yes, I am. 16:39:39
A Of operating systems that had multi-word	21 Q Okay. At Cisco, do you have a terminology
22 commands? I was most familiar with UNIX and	22 for the different levels of the hierarchy?
23 'TOPS-20,	23 A No, no particular terminology for the
The state of the s	24 hierarchy. There would be a top level command, top
Q Any others?	24 incrarchy. There would be a top level command, top

I Q So in this case, there's a command, for 16:40:25	1 "IF" instead of "interface." 16:45:51
2 example, "clear ARP-cache," right?	2 A It was just an example of choice of
3 A Yes.	3 choice of word.
4 Q In that command, is that the ARP cache	4 But under discussion was rather what was a
5 that's being cleared? 16:40:55	5 hierarchy here. And these are the "interface" 16:46:05
6 A I believe that command clears clears	6 with an argument after it is the first part of a
7 all address resolution caches. There's more than	7 hierarchy.
8 one address resolution protocol in the system, or at	8 You could draw this in a tree shape, and
9 least there was when we were a primarily	9 it would be the hierarchy would be very obvious.
10 multi-protocol router. 16:41:19	10 Q So is it still would it still be using 16:46:36
Q Okay. If you go to page 6, the next page,	11 your hierarchy if this command were "IF Ethernet"?
12 now, for this, "interface Ethernet," is that a	12 MR. NEUKOM: Objection. Calls for
13 hierarchy?	13 speculation, vague.
4 A It is	14 THE WITNESS: There's many other pieces to
MR. NEUKOM: Objection. Calls for opinion 16:42:27	15 the there are many other pieces to the hierarchy. 16:47:00
16 testimony.	16 This is I was aiming for a hierarchical,
7 THE WITNESS: It is the leading element of	17 symmetric, aesthetically pleasing set of
8 a hierarchy.	18 configuration command expressions.
9 One of the choices that I made at Stanford	19 BY MR. FERRALL:
20 actually in introducing the "interface" command was 16:42:49	20 Q Tell me about what's aesthetically 16:47:28
I that it assumed a block structure where I could say	21 pleasing about this command expression "interface
22 things like "interface Ethernet zero," and then I	22 Ethernet"?
23 could say I could have a bunch of at Stanford	23 MR. NEUKOM: Objection. Calls for opinion
4 I had a bunch of what we called interface sub	24 testimony.
25 commands that would follow on subsequent lines. 16:43:17 Page 154	25 THE WITNESS: This is a command fragment. 16:47:4 Page 15
I could very well have made the choice to 16:43:21	1 This is the leading part of a command. There's more 16:47:45
2 write that as, on one line, for example, "interface	2 to it than this.
3 Ethernet zero address," an IP address, a subnet	3 MR. NEUKOM: Brian, I think at this point
4 mask, and you would have a hierarchy of	4 we're coming up on an hour and a half. Do you mind
5 configuration stuff. 16:43:44	5 if we take a short break? 16:48:05
6 Going outside into Cisco, you could have	6 MR. FERRALL: Well, let me just ask one
7 "interface Ethernet zero." I could have "IP" and	7 more question.
8 then a bunch of IP keywords after that. I could	8 Q If you go back to the "clear" example on
9 have "interface Ethernet zero DECnet" and have a	9 page 5, am I right that your conception of a
	y page 3, and i right that your conception of a
	40 hierarchy for this command would still be 16:48:38
0 bunch of DECnet keywords underneath that. And that 16:44:00	
0 bunch of DECnet keywords underneath that. And that 16:44:00 1 would very clearly demonstrate a hierarchy.	10 hierarchy for this command would still be 16:48:38
bunch of DECnet keywords underneath that. And that     would very clearly demonstrate a hierarchy.  I made the aesthetic choice of saying —	10 hierarchy for this command would still be 16:48:38 11 implemented even if the "clear" keyword command were
0 bunch of DECnet keywords underneath that. And that 16:44:00 1 would very clearly demonstrate a hierarchy. 2 I made the aesthetic choice of saying 3 of turning the word "interface" which I could	10 hierarchy for this command would still be 16:48:38  11 implemented even if the "clear" keyword command were 12 changed to something else like "white"? Is that
0 bunch of DECnet keywords underneath that. And that 16:44:00 1 would very clearly demonstrate a hierarchy. 2 I made the aesthetic choice of saying 3 of turning the word "interface" which I could 4 have chosen something like "IF" or "net-in" or	10 hierarchy for this command would still be 16:48:38 11 implemented even if the "clear" keyword command were 12 changed to something else like "white"? Is that 13 right?
0 bunch of DECnet keywords underneath that. And that 16:44:00 1 would very clearly demonstrate a hierarchy. 2 I made the aesthetic choice of saying 3 of turning the word "interface" which I could 4 have chosen something like "IF" or "net-in" or 5 something like that, but I chose "interface" I 16:44:23	10 hierarchy for this command would still be 11 implemented even if the "clear" keyword command were 12 changed to something else like "white"? Is that 13 right? 14 MR. NEUKOM: Objection. Vague, compound, 15 hypothetical, calls for opinion testimony. 16:49:04
0 bunch of DECnet keywords underneath that. And that 16:44:00 1 would very clearly demonstrate a hierarchy. 2 I made the aesthetic choice of saying 3 of turning the word "interface" which I could 4 have chosen something like "IF" or "net-in" or 5 something like that, but I chose "interface" I 16:44:23 6 like writing words out I chose as a typing	10 hierarchy for this command would still be 16:48:38  11 implemented even if the "clear" keyword command were 12 changed to something else like "white"? Is that 13 right?  14 MR. NEUKOM: Objection. Vague, compound, 15 hypothetical, calls for opinion testimony. 16:49:04  16 THE WITNESS: Are you asking if I could 17 have chosen another word besides "clear"? 18 BY MR. FERRALL: 19 Q No. I'm asking if you're another way 20 of asking it is does the concept of your hierarchy 21 depend upon the selection of the first word, or is 22 it independent of that?

2 (Exhibit 40 was marked for identification 3 and is attached hereto.)
4 BY MR. FERRALL: 5 Q Okay. We just marked as Exhibit 40 an 17:13:32
6 email bearing control numbers CSI-CLI-00746398. It
7 appears to be between you and a Craig Fox, among
8 others.
9 And I guess my only question for you,
10 Mr. Lougheed, is do you have any reason to believe 17:13:57
11 that you didn't send this email that's Exhibit 40?
12 A It looks like I sent it. I have not had a
13 chance to read it.
14 Q Are you on the Parser Police mailing list?
15 MR. NEUKOM: Objection. Vague. 17:14:36
16 THE WITNESS: At one point I was.
17 BY MR. FERRALL:
18 Q For what period of time were you on that
19 mailing list?
20 A I don't I don't remember a time period, 17:14:56
21 but it has been many years since I have been on that
22 mailing list.
23 Q Are you on the Fellows mailing list?
24 MR. NEUKOM: Objection. Vague.
25 THE WITNESS: I'm on I've been on 17:15:32 Page 160
1 various mailing lists that have included Cisco 17:15:33 2 Fellows. 3 BY MR. FERRALL: 4 Q Can you tell me which ones those are, to 5 the best of your knowledge? 17:15:44
6 A To the best of my knowledge, there was
7 a an older mailing list called Fellows@cisco.com.
8 More recently there's a mailing list called
9 DE-Fellows-Meeting-Attendees.
10 Q And you've been on both of those? 17:16:05
II A Yes.
12 Q 1 don't have any other questions about
13 that.
14 A Okay. I rather liked what I wrote.
15 Q Tell me what a loopback is. Are you 17:16:35
16 familiar with that term?
17 A It's a term I believe it originated in
18 electronics, certainly in pieces of hardware, where
19 you can take the output signal of a device and put
20 it into to input and see if it receives it 17:17:18
21 correctly.
22 It tests the internal state machine of
23 whatever entity you're testing.
24 Q When did you first hear it used in the

a ordické a nagrazaná saven ca.	CONTROL OF STREET
1 command "clear" that blanks a screen. I'm not aware 17:47:22	1 jitter in the positioning so that it wouldn't burn 17:52:31
2 of any operating system that uses "clear" in the	2 in those letters in the in one spot in the
3 sense that the Cisco CLI uses "clear."	3 terminal.
4 BY MR. FERRALL:	4 Then I think after we left Stanford
5 Q Tell me about the creative process that 17:47:57	5 actually, I'm not clear when the MOTD was 17:52:55
6 went into your selection of the word "clear" as the	6 implemented. I suspect it was after 1 left
7 first keyword in these commands.	7 Stanford, but I'm not my memory is not clear on
8 MR. NEUKOM: Objection, Vague and	8 that.
9 compound.	9 Q So to be clear, you're not saying that you
0 THE WITNESS: I needed some way of 17:48:19	10 came up with the term "banner" as a command, are 17:53:1
1 resetting or clearing data structures in the box,	11 you?
2 something that's very useful in the debugging of	12 MR. NEUKOM: Objection. Misstates prior
3 that sort of action is very useful in debugging or	The state of the s
그 아이를 하다면서 맛이지 않는데 살이 없는데 그렇게 얼굴하다.	13 testimony, vague.
4 software, correcting problems in a running system	14 THE WITNESS: 1 implemented certain
5 and the like. 17:48:53	15 functionality that I triggered with that 17:53:26
6 And "reset" or "clear" or "zero" or	16 configuration command.
7 "restart" certainly could have been possibilities.	17 BY MR. FERRALL:
8 It was a very generically simple example. It was	18 Q I'm going to ask the question again.
9 another sort of generic activity of I wanted to	19 Are you saying that you came up with the
20 clear or reset some data structures. And that 17:49:20	20 term "banner" as a command? 17:53:38
11 one I don't recall, but I suspect that one seemed	21 MR. NEUKOM: Same objections.
2 reasonable and came to mind.	22 THE WITNESS: That was a choice that I
3 BY MR. FERRALL:	23 made.
4 Q Do you recall why you selected the word	24 BY MR. FERRALL:
25 "clear"? 17:49:47	25 Q You borrowed it from another operating 17:53:55
Page 174	Page 176
A It seemed it seemed aesthetically 17:49:52	1 system, didn't you? 17:53:57
2 pleasing to me. It was something that was	2 MR. NEUKOM: Objection. Asked and
3 descriptive of an action that I wanted to take that	3 answered.
4 was a fairly generic action, a fairly common action.	4 THE WITNESS: I have no memory of
5 Q What does "banner MOTD" mean? 17:50:47	5 borrowing it. 17:54:05
6 A MOTD is message of the day.	6 BY MR. FERRALL:
7 Q Did you make up that acronym?	7 Q Okay. Do you have a memory of the
8 A. No, I did not	8 creative process whereby you decided on "banner" as
9 Q Who did?	9 a command?
0 A I don't know. 17:51:07	10 A I don't remember the details. 17:54:21
1 Q Did you coin the term "banner" as an	11 (Exhibit 42 was marked for identification
2 operating system command?	12 and is attached hereto.)
3 MR. NEUKOM: Objection. Vague.	13 BY MR. FERRALL:
THE WITNESS: I simply implemented the	14 Q We've marked as Exhibit 42 another excerpt
5 command. 17:51:37	15 of code that we've reformatted. It bears control 17:54:43
6 BY MR. FERRALL:	16 numbers CSI-CLI-01108326.
7 Q Are you aware of operating systems in	17 MR. NEUKOM: Counsel, I take it this is a
8 existence before you joined Cisco that used the	18 printout of a file or a document that was produced
9 command "banner"?	19 with an AEO designation.
9 command "banner"? 0 A I don't recall any at this point. 17:51:52	20 MR. FERRALL: Right, 17:55:02
9 command "banner"? 0 A I don't recall any at this point. 17:51:52 1 Q When did you come up with the command	20 MR. FERRALL: Right, 17:55:02 21 MR. NEUKOM: Okay. So we're going to mark
9 command "banner"?  0 A I don't recall any at this point. 17:51:52  1 Q When did you come up with the command  2 "banner MOTD"?	20 MR. FERRALL: Right, 17:55:02 21 MR. NEUKOM: Okay. So we're going to mark 22 the witness's copy and we'll ask that all copies in
9 command "banner"?  0 A 1 don't recall any at this point. 17:51:52  1 Q When did you come up with the command  2 "banner MOTD"?  3 A The command that came first was just	20 MR. FERRALL: Right, 17:55:02 21 MR. NEUKOM: Okay. So we're going to mark
9 command "banner"? 10 A I don't recall any at this point. 17:51:52 11 Q When did you come up with the command 12 "banner MOTD"? 13 A The command that came first was just 14 "banner," and its function was to print a vacant	20 MR. FERRALL: Right, 17:55:02 21 MR. NEUKOM: Okay. So we're going to mark 22 the witness's copy and we'll ask that all copies in 23 the room be marked by hand with the phrase "Highly 24 Confidential - AEO."
9 command "banner"?  10 A I don't recall any at this point. 17:51:52  11 Q When did you come up with the command  12 "banner MOTD"?  13 A The command that came first was just	20 MR. FERRALL: Right, 17:55:02 21 MR. NEUKOM: Okay. So we're going to mark 22 the witness's copy and we'll ask that all copies in 23 the room be marked by hand with the phrase "Highly

4	notice on the front.	4 routing protocol, they'd be attached to the NSFNET
5	Do you see that? 17:55:29	5 backbone as well running a different routing 17:59:39
6	A Yes, I see that.	6 protocol.
7	Q Okay. Do you know when do you	7 And since routing protocols would give
8	recognize it?	8 incommensurate metrics, metrics that could not be
9	A Yes, I do.	9 compared, I developed a concept of distance that
0	Q What is it? 17:55:36	10 says if one routing protocol says it knows a route 18:00:08
	i management i i	11 to one destination and another routing protocol says
		12 it knows a route to that same destination, which
		13 the routing protocol with the smallest
4	Q And when did you compose what's	14 administrative distance would be the one that would
5	Exhibit 42? 17:56:02	15 be entered into the routing table. 18:00:24
6	A Is there a question?	16 And so that was the problem, and my
7	Q Yes. I asked when did you compose	17 solution was the administrative distance mechanism
	Exhibit 42?	18 that I described.
9	A Apparently June of 1985.	19 And when I implemented BGP, that was a
0	Q And you were employed by Stanford at that 17:56:28	20 natural extension to include for BGP as well to be 18:00:49
	time, right?	21 able to configure an administrative distance to
22	A Correct.	22 determine the believability of BGP.
3	Q We had talked earlier about the ARP.	23 If no routing protocol if only one
	address resolution protocol.	24 routing protocol knew the destination, you would
25	Do you remember that? 17:56:57	25 believe that. If there are two or more, 18:01:10
23	Page 178	Page 18
1	A Yes. 17:56:58	1 administrative distance was the tie-breaker. 18:01:16
2	Q Okay.	2 Q Sorry. I'm going to jump back to ARP.
3	A I remember you asked questions about that.	There's a term you use associated with
4	Q Are you familiar with there being a	4 ARP, "ARP cache," We talked about that earlier in
5	provision for time-outs in the ARP protocol? 17:57:15	5 looking at one of the "clear" commands, right? 18:01:52
6	MR. NEUKOM: Objection. Vague and	6 Where did the term "ARP cache" come from?
7	compound.	7 A The cache is a logically a list of
8	THE WITNESS: There is the ARP entries	8 items. An ARP cache would be a list of ARP requests
9	can become stale. If you unplug the computer or you	9 that have been satisfied, including their MAC
		10 addresses and how long since the last time we'd seen 18:02:37
	network interface, entries will become stale.	11 a the router had seen an ARP request go by for
	Implementing a time-out is a way of making sure the	12 that particular source address.
	cache isn't stale.	13 That sort of computer science concept of a
	BY MR. FERRALL;	14 cache is found all over
5	Q Are you aware of there being a provision 17:58:10	15 Q One of the commands that is indicated that 18:03:14
	for time-outs in the RFC for ARP?	16 you authored is the command "boot system."
7	MR. NEUKOM: Objection. Vague and	17 Had you ever heard someone use the words
	compound, asked and answered.	
9	THE WITNESS: I'm not I don't remember	MR. NEUKOM: Objection. Vague.
0	such language right now. 17:58:38	20 THE WITNESS: I had heard phrases like 18:03:45
	BY MR. FERRALL:	21 "boot the system up," "reboot the system," "reload
		22 the system," "start the system," "restart the
2	Q Did you create the term "distance BGP"?	
2	A Yes.	23 system."

1 A When Cisco announced the actually, it 18:06:22	1 BY MR. FERRALL: 18:11:36
2 was in the Mercury News in the morning, and then	2 Q Did you compose the command "fimers basic
3 later through internal email at Cisco.	3 RIP"?
4 Q When the suit was filed?	4 A I believe I did.
5 A When the suit was filed. 18:06:38	5 Q Prior to your joining Cisco, are you 18:11:55
6 Q Okay. Not before?	6 familiar with any commands that use the word
7 A Not before.	7 "timers"?
8 Q Did you have any involvement in the	8 MR. NEUKOM: Objection. Vague.
9 litigation between Cisco and Huawei?	9 THE WITNESS: No, I was not aware of any
MR. NEUKOM: That's a "yes" or "no" due to 18:06:49	10 operating system, general purpose or network 18:12:13
11 privilege concerns.	11 specific, that used had a "timers" command.
12 THE WITNESS: No, I was not involved with	12 BY MR. FERRALL:
13 Huawei.	13 Q How did you come up with the command
14 BY MR. FERRALL:	14 "timers basic RIP"? Describe that creative process
15 Q Are you able to sorry. Strike that. 18:07:26	15 for me. 18:12:30
16 Were you involved at all in composing any	16 A There developed a need or a desire to
17 of the commands that begin with "AAA"?	17 change some of the fundamental timing constants
18 A No.	18 of I think first was the IGRP routing protocol,
I9 Q Can you tell me how the "clock set"	19 and I implemented a command that allowed those
20 command was composed? 18:08:07	20 timers to be user-configured. 18:12:59
21 A No, I cannot. I wasn't involved.	21 And later on I or someone else extended
Q Can you tell me how any of the IPv6	22 that to the RIP timers so customers could speed up
23 commands were composed?	23 or slow down the pulse of routing updates.
la. ( TT	
24 A Yes.	24 Q And when did that occur?
24 A Yes. 25 Q Which ones? 18:08:30 Page 183	24 Q And when did that occur? 25 A 1988 or 1989. 18:13:36 Page 185

	· - ·
1 Q How did you choose the term the words 18:13:39	1
2 "timers basic" for this function?	2
3 A I don't remember where "basic" came from.	3
4 But using the keyword "timers" was my was my	4
5 introduction, was my creation. 18:14:00	5
6 MR. NEUKOM: Counsel, I believe we're now	6
7 beyond seven hours.	7
8 MR. FERRALL: Okay. Well, I – given	8 I, KIRK LOUGHEED, do hereby declare under
	9 penalty of perjury that I have read the foregoing
9 Mr. Lougheed's tenure at Cisco, I thank him for his	1
10 time, but I will say I think we deserve some more 18:14:22	10 transcript; that I have made any corrections as
11 time with him.	11 appear noted, in ink, initialed by me, or attached
But I understand seven hours is up and	12 hereto; that my testimony as contained herein, as
13 you're going to say enough is enough for today I	13 corrected, is true and correct.
14 take it; is that right?	14 EXECUTED this day of,
15 MR. NEUKOM: Certainly for today for the 18:14:31	15 2015, at,
16 sake of the witness. And we will respectfully	16 (City) (State)
17 disagree with the idea that counsel needs more than	17
18 seven hours	18
19 MR. FERRALL: Okay.	
20 MR. NEUKOM: — needs more than today. 18:14:41	20 KIRK LOUGHEED
21 But we can discuss that for another day.	21
In the meantime, I should note for the	22
23 record the witness reserves the right to review the	23
24 transcript and make corrections.	24
25 Brian, I'm not sure I did that for 18:14:51	25
Page 186	Page 188
1 Mr. Tjong. If you're okay with it, I'd like to just 18:14:53	1 I, the undersigned, a Certified Shorthand
2 do a stipulation across the case that both sides	2 Reporter of the State of California, do hereby
3 have the 30-day review and errata right for all	3 certify:
4 transcripts regardless whether counsel puts it on	4 That the foregoing proceedings were taken
5 the record at the depo as a two-way street. 18:15:04	5 before me at the time and place herein set forth;
6 MR. FERRALL: That's fine. I thought it	6 that any witnesses in the foregoing proceedings,
7 existed as a matter of procedure anyway. So that's	7 prior to testifying, were administered an oath; that
8 fine.	8 a record of the proceedings was made by me using
9 MR. NEUKOM: I hope you're right, but glad	9 machine shorthand which was thereafter transcribed
	10 under my direction; that the foregoing transcript is
10 to have the stipulation, even if it's unnecessary. 18:15:17  11 MR. FERRALL: Okay.	11 a true record of the testimony given.
	12 Further, that if the foregoing pertains to
12 MR. NEUKOM: Thanks very much.	13 the original transcript of a deposition in a Federal
13 THE VIDEO OPERATOR: This concludes	14 Case, before completion of the proceedings, review
14 today's videotaped deposition of Mr. Kirk Lougheed.	15 of the transcript [X] was [] was not requested.
15 We're off the record at 6:15 p.m. Thank you. 18:15:25	16 I further certify I am neither financially
16 (TIME NOTED: 6:15 p.m.)	17 interested in the action nor a relative or employee
1700	18 of any attorney or any party to this action.
18	19 IN WITNESS WHEREOF, I have this date
19	20 subscribed my name.
